

Eye Drop Shop

BRAND GUIDELINES - 2026

ABOUT US

OUR STORY

Eye Drop Shop was founded by Dr. Claudine Courey, an optometrist based out of Montreal, Canada. After graduating from the University of Montreal she furthered her studies to first complete her Residency and then a Master of Science (MSc) degree in Corneal Disease & Contact Lenses.

She then went on to become a Fellow of the American Academy of Optometry (FAAO) as well as a Fellow of the Scleral Lens Society (FSLs). She is passionate about helping patients with dry eye disease and has been invited as a guest lecturer across Canada and the US as well as Europe to speak on the topic.

OUR MISSION

Dr. Claudine Courey's mission is to be able to help patients suffering from Dry Eye Disease with the most up-to-date information and treatment options possible.

When she realized that most high quality eye care products are not sold in pharmacies or anywhere that was easily accessible, and that her patients were not able to find the best treatments possible, she knew she had to do something about it.

LOGO

MARGINS

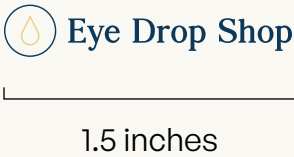

To ensure the logo’s legibility and visual impact, this area must remain free of any other graphic elements in order to avoid confusion or visual clutter.

The clear space surrounding the logo must be proportional to the height of the drop icon taken from the logo. This allows it to breathe and be perceived clearly across all applications, ensuring a consistent and professional use of the visual identity.

The minimum size for logo usage is 1.5 inches.

MINIMAL SIZE

LOGO

VARIATIONS

Our logo system includes vertical, horizontal, and white variations to ensure consistent and flexible use across all platforms. The version selected should always be the one that best fits the layout, context, and visual space while maintaining brand recognition.

The white logo variation is used on darker backgrounds or whenever increased contrast is needed for optimal visibility.

Whenever possible, we **prioritize keeping the drop icon positioned on the left or centered condensed** to support visual balance.

HORIZONTAL LOGO, DROP ON THE LEFT

VERTICAL LOGO, DROP CENTERED CONDENSED

HORIZONTAL LOGO, DROP ON THE RIGHT

VERTICAL LOGO, DROP CENTERED SPACED

ALL VARIATIONS HAVE WHITE ALTERNATIVES

LOGO

IMPROPER USAGE

To ensure the logo remains legible and consistent at all times, please avoid the following practices:

- 1. Stretching or compressing the logo
- 2. Tilting or rotating the logo
- 3. Changing the colour of the logo for a colour not in the brand guide
- 4. Changing the logo’s typography
- 5. Adding effects to the logo
- 6. Adding or removing elements from the logo
- 7. Changing the arrangement or proportions of the logo elements
- 8. Adding a shadow that compromises the logo’s legibility
- 9. Adding an outline to the logo

COLOURS

TEXTURES & BACKGROUNDS

Suggested background textures should remain subtle, refined, and supportive of the overall visual identity. When the context permits it, and no specific media or product needs to be the primary focal point, iris textures may be used as background elements to reinforce the eye care universe.

We also recommend the use of soft gradients created by swirling the brand colours together, enhanced with a subtle layer of grain. These textures help add depth, warmth, and visual richness while maintaining a minimal aesthetic.

The drop can also be used as a background texture.

TYPOGRAPHY

HIERARCHY

To provide flexibility across different types of communication, two complementary font combinations are suggested.

Kellissa Regular is only to be used as a heading. **General Sans** is primarily used for the main text. These combinations are highly suggested, but other combinations may be used depending on the context and format.

COMBINATION 1

General Sans Regular

PHOTOGRAPHY

Lighting should remain soft and diffused, inspired by studio photography, while maintaining subtle contrast to create depth and dimension. **Shadows should stay open and natural, never too harsh.**

The overall colour tone should lean toward warm whites to create a soft and premium atmosphere.

For product photography, compositions should remain minimal and refined, with **the subject occupying at least 75% of the frame** to ensure clarity and visual impact.

For human-focused imagery, lighting should feature a slight contrast to softly define facial features and natural contours, while avoiding pronounced shadows.

SOCIAL MEDIA

Deep blue tones are used throughout the brand to reinforce trust, expertise and help products stand out clearly across all touchpoints.

For educational, informative or tip-based content, we prioritize human-centered visuals such as skin textures, close-ups and lifestyle imagery to create a stronger connection with the audience we are speaking to.

When showcasing products, **visuals remain polished and professional**, incorporating subtle touches of blue to maintain brand consistency while keeping the focus on the product itself.
